

## **Practicing If, Else Statements:**

1. In Kaggle, go to the following notebook template that has been created for you:  
<https://www.kaggle.com/code/austinhinkel/phy255-randomwalk>. Click the three dots at the top right and select copy and edit notebook.
2. The first three cells have been completed for you. Read through them and explain (in words) what the function called “coinflip()” does.
3. The fourth and fifth cells need to be completed. Complete the code, explain what your code does (in words!), and sketch the graph you create.
